

Division of Analytical Chemistry  
American Chemical Society

## Grants for International Year of Chemistry Activities

The Division is interested in supporting outreach projects that will inform the chemistry community and the public about the significance of analytical chemistry for the IYC themes of environment, energy, materials, and health.

Projects could consist, for example, of a plenary lecture or symposium; an activity designed for pre-college students or the general public; or a field experience related to the water analysis project of the IYC.

The Division will provide up to \$500 each for up to ten projects at undergraduate institutions and up to ten projects at graduate institutions. Applications may be submitted by a group of institutions, such as a regional Younger Chemists Committee or Student Affiliates group.

Applications are to include the following information:

- First page: Title of activity; Lead institution; Project leader's name, institutional affiliation, telephone and email address; amount of requested funding.
- Second page:
  - Group targeted (graduate students, undergraduate students, pre-college students; children; general public, etc.);
  - Description of the proposed activity and how it will address the significance of analytical chemistry for the IYC themes (two or three paragraphs)
  - How the activity will be publicized to reach the intended audience;
  - How the requested funds will be used, such as for speaker travel (but not honoraria); materials for a laboratory or field experience (including for safety); take-home information; etc.

Applications must be submitted by June 1, 2011 as attachments to email to Miquela Sena at [office@analyticalsciences.org](mailto:office@analyticalsciences.org). Decisions will be communicated by July 1, 2011, and activities scheduled between August 1, 2011 and December 15, 2011.

Questions should be directed to: Roland Hirsch, [roland.hirsch@science.doe.gov](mailto:roland.hirsch@science.doe.gov).

Information on IYC is at <http://www.chemistry2011.org/> and <http://iyc2011.acs.org/>

The Global Water Experiment is at <http://water.chemistry2011.org/web/iyc>

Information on the ACS Division of Analytical Chemistry is at <http://www.analyticalsciences.org/>

Issued on April 11, 2011.
